We will be celebrating two very significant Creation Days: **WORLD WATER DAY - March 22** and **EARTH DAY - April 22**. These two days are obviously very closely linked as they focus on the great-God given gift of Creation, our planet, and its relationship to the wider universe. Water is the major component of our earth, as oceans form the biggest surface of earth, and all life on earth depends on water. Earth with what is underneath it and on top of it, with its atmosphere, is the major source for producing water. These two wonderful creation days focus on a special dimension of our common home. **Please take some time to read the article from Bishop Michael Pfeifer that has been posted on our cluster website.**

God does not call the qualified. He qualifies those he calls.
